

# About Us

Promote Sustainable,  
Quality, Profitable  
Forage Production.

**Who:** NPFA is a grassroots association open to forage growers, buyers, industry partners, and anyone with an interest in forages!

**What:** Join us in creating a networking and education group focused on all things forage! We include annual forages/cover crops, alfalfa, silage, grazing systems, and more!

**When:** We host and attend events and promote forage learning opportunities year-round!

**Where:** We are open to anyone operating in or near the Northern Plains region. Our events occur around the region on an annual basis.

# Learning Opportunities

NPFA focuses on education and networking to bring local forage producers together in an effort to strengthen our industry. We also promote forage research and legislation for the betterment of the industry. Each year we partner in hosting a summer forage field day event and annual winter meeting with educational seminars. In addition, we host and promote field tours, webinars, and networking events throughout the year. This group is growing rapidly and full of potential to strengthen your operation or business and Northern Plains forage production as a whole!
